

ADVISORY WORKSHOP

Agent Governance Readiness Assessment

Understand where you stand. Know what to build next.

A comprehensive evaluation of your current AI agent governance posture measured against the 12 principles of Agent Runtime Governance. Your team receives a clear maturity score, a gap analysis, and a prioritized roadmap to reach the governance level your organization requires.

DURATION

2–3 days

INVESTMENT

\$20,000–\$40,000

AUDIENCE

CISOs, AI directors, compliance leaders, platform engineering heads

WHY THIS MATTERS NOW

Most organizations cannot answer a basic question: how many AI agents are running, who owns them, and what are they authorized to do? Without a baseline, every new agent deployment adds risk that cannot be measured or managed.

Focus Areas

- Current AI agent inventory, ownership, and lifecycle management
- Runtime governance gaps across authorization, policy, and enforcement
- Authorization model weaknesses and standing privilege risks
- Observability and auditability gaps for regulatory readiness
- Memory and state governance for agent context and credentials
- Operational maturity against the governance maturity model

Deliverables

- ✓ Governance gap analysis against the 12 non-negotiable principles
- ✓ Maturity model assessment with current-state scoring
- ✓ Reference architecture recommendations for your environment
- ✓ Prioritized roadmap with quick wins and strategic milestones

IDEAL FOR

Enterprises with AI agents already in production (or about to be) who need executive-level visibility into the governance gap. Best for CISOs and CIOs preparing board updates, compliance teams building audit readiness, and platform leaders setting the next 6 to 12 months of investment.

1

Pre-Workshop Discovery

We review your environment and current controls. A brief intake questionnaire ensures we arrive prepared.

2

Live Working Sessions

Hands-on sessions with your security and technical teams. Real architecture, real decisions.

3

Architecture Review

We synthesize findings into actionable artifacts: blueprints, gap analyses, and roadmaps.

4

Final Delivery

A structured readout with your leadership team. Clear findings and a path forward.

Book a Workshop

We typically respond within 2 business days.

SAMPLE DELIVERABLE - READINESS ASSESSMENT

Agent Governance Readiness Assessment

Maturity scoring against the 12 Principles for Agent Runtime Governance, with prioritized roadmap to Level 3 (Governed).

PREPARED FOR	Acme Capital
SECTOR	Financial Services (Illustrative)
ENGAGEMENT	Agent Governance Readiness Assessment
SCOPE	Enterprise AI agent platform (18 agents in production)
DELIVERED	March 2026

CONFIDENTIAL. This assessment contains findings and recommendations prepared exclusively for Acme Capital. Distribution outside the authorized recipients is prohibited without written consent.

DOCUMENT	Sample Readiness Assessment
SAMPLE CLIENT	Acme Capital (Illustrative)
LENGTH	5 pages
FORMAT	PDF (with cover, sections, and appendices)

What the Deliverable Contains

- ### Executive Summary

Overall maturity score, headline findings, critical governance gaps with severity ratings.
- ### Maturity Scorecard

Visual scoring against all 12 principles with level-by-level assessment and progress bars.
- ### Reference Architecture

Target architecture diagram showing how the ARG layer integrates with your existing IAM stack.
- ### Prioritized Roadmap

Month-by-month roadmap to reach Level 3 (Governed) with expected maturity progression.
- ### Integration Points

Specific integration points with named technologies (Okta, ForgeRock, Splunk, etc.).
- ### Success Criteria

Measurable outcomes the organization can track against the roadmap.
