

EXECUTIVE WORKSHOP

AI Agent Risk & Governance Clarity

Understand the risk. Make informed decisions.

A strategic briefing for executive teams who need clarity on AI agent risk before making adoption, investment, or governance decisions. No technical prerequisites. You leave with a clear picture of your exposure, your gaps, and your next steps.

DURATION

Half day (4 hours)

INVESTMENT

\$5,000–\$8,000

AUDIENCE

CISOs, CIOs, VPs of Security, VP Engineering, compliance executives, board advisors

WHY THIS MATTERS NOW

AI agents are being deployed across the enterprise. Most leadership teams lack a clear picture of how many agents are running, what they can access, and what governance gaps exist. This briefing provides that clarity in a single session.

Focus Areas

- What AI agents actually do in enterprise environments
- Where agents introduce risk that traditional controls do not cover
- The difference between AI model safety and AI agent governance
- How to evaluate your current AI agent exposure
- What governed agent operations looks like in practice
- Decision framework: build, buy, or wait on agent governance

Deliverables

- ✓ Executive risk briefing document tailored to your organization
- ✓ AI agent exposure assessment (current state snapshot)
- ✓ Governance gap summary mapped to business risk
- ✓ Decision framework with recommended next steps

IDEAL FOR

Executive teams preparing to make AI agent adoption, investment, or governance decisions. Best for CISOs and CIOs who need a clear, non-technical picture of agent risk exposure before committing resources. Also valuable as preparation for board-level AI governance discussions.

1

Pre-Workshop Discovery

We review your environment and current controls. A brief intake questionnaire ensures we arrive prepared.

2

Live Working Sessions

Hands-on sessions with your security and technical teams. Real architecture, real decisions.

3

Architecture Review

We synthesize findings into actionable artifacts: blueprints, gap analyses, and roadmaps.

4

Final Delivery

A structured readout with your leadership team. Clear findings and a path forward.

Book a Workshop

We typically respond within 2 business days.
